Testing & Automation: Functional Testing, Performance Testing, API Testing, Regression, Test Automation, UAT, Defect Analysis, Statutory/Compliance Testing
Leadership: Team Leadership, Mentoring, Security Test Coordination, Stakeholder Reporting, Training & Knowledge Transfer
Tools: SQL, Python, Java, Postman, JMeter, n8n, Power Automate, Azure DevOps, GitHub, PowerBI, Excel

Experience

Lead QA Consultant, Qniverse Pvt. Ltd – Kathmandu, Nepal October 2025 – Present

- Lead a 10-member QA team, including 2 senior, 4 mid-level and 3 associate engineers, reporting directly to the CEO.
- Lead QA across enterprise programs: Qnipay payroll automation (Denmark, Singapore, New Zealand, UK), Global Remittance System, Core Banking System, Rota Management System, HR System and ERP (Microsoft Dynamics 365 Business Central).
- Keep payroll test suites current with changing statutory rules and new versions before each UK release.
- Identified a defect in HMRC's official UK calculator during payroll validation; HMRC acknowledged the finding and the team.
- Found a critical defect in the maker–checker rule of the Global Remittance System before release and led the overnight fix and re-verification.
- Coordinated with the dedicated cybersecurity testing team on security testing for the Global Remittance and Rota Management systems.
- Plan QA capacity and oversee test design, test environments, test data and automation across projects.

Head AI & QA Automation Instructor, Qrius by Qniverse February 2026 – Present

- Trained 500+ people through sessions at IIMS, Techspire College, Lincoln International College and in-house trainings.
- Lead the AI & QA Automation program, designing curriculum and delivering instruction on test automation and AI-assisted testing.

QA Engineer, Qniverse Pvt. Ltd – Kathmandu, Nepal October 2024 – October 2025

- Performed AI powered engineering and utilized GitHub, SQL, JMeter and performance testing of mobile apps and PowerBI projects.
- Led User Acceptance Testing (UAT) sessions and knowledge-sharing sessions across the company.
- Identified risks and raised pertinent questions to enhance project outcomes.

Associate QA Engineer, Qniverse Pvt. Ltd – Kathmandu, Nepal October 2023 – October 2024

- Developed automation scripts using n8n and Power Automate for UI testing of payroll software.
- Conducted API testing using Postman and managed tasks and bugs using Azure DevOps.
- Facilitated knowledge-sharing sessions representing the company to the public and internal teams.
- Mentored interns on Microsoft D365, office practices, and various technical and non-technical skills.
- Proficient in agile methodologies, software engineering principles, and project management.

QA Intern, Qniverse Pvt. Ltd – Kathmandu, Nepal July 2023 – October 2023

- Expertise on UK payroll systems and Microsoft Dynamics 365 (CRM, Business Central, Field Service).
- Applied QA practices and enhanced presentation and communication skills.

Education

London Metropolitan University, Islington College, BSc (Hons) Computing December 2021 – December 2024

- Percentage: 72.56
- Coursework: Artificial Intelligence, Advanced Database Systems Development, Cloud Computing and the Internet of Things, Advanced Programming and Technologies, Logic and Problem Solving

Projects

Qnipay Payroll Automation (Denmark, Singapore, New Zealand, UK)

- Applied QA expertise and automated scripts to ensure compliance with UK rules through integration tests.
- Tools Used: Playwright with TS, AL Test Tool.

Global Remittance System

- Reverse-engineered an undocumented remittance system to establish complete functional and technical documentation. Defined requirements, mapped APIs and JSP workflows, and executed AI powered automated and performance testing to validate end-to-end functionality.
- Tools Used: SQL, Playwright with TS, Power Automate, Excel.

Core Banking, Rota Management and HR Systems

- Led QA delivery for the Core Banking, Rota Management and HR systems, including automation & security testing coordination for Rota Management.

D365 CRM System

- Handled end-to-end client requirements, performed risk analysis, data migration/testing, and resolved system-level issues. Maintained consistent client communication to ensure successful delivery and alignment with business objectives.
- Tools Used: Power Automate, Excel, SQL, D365 Business Central, D365 CRM

D365 Field Service

- Performed QA and validation of the D365 Field Service system based on client requirements. Tested workflows, scheduling, and reporting features, ensuring seamless functionality across mobile and web platforms.
- Tools Used: Power Automate, Excel, D365 CRM, Python

Restaurant Management System

- A web app that streamlined bookings, online ordering with secure e-payments, improving service efficiency.
- Tools Used: HTML, CSS, Laravel, MySQL.

Full Stack Blog Article

- A blog platform with user interactions, posting features, and admin dashboards for data visualization.
- Tools Used: Rzeact.js, .NET, ChakraUI, Entity Framework Core, PostgreSQL.

Certifications

AWS Academy Machine Learning, AWS Academy Cloud Foundations, Advanced PowerBI Certification, Data Analysis with Python
